

BASICS OF WEB3

An in-depth introduction to the fundamentals and key concepts

WEB 3.0

BEGINNER

In the rapidly evolving digital landscape, Web3 represents a paradigm shift towards a more open, decentralized, and user-centric internet. Our masterclass 'The Basics of Web3' offers a comprehensive exploration of this groundbreaking ecosystem, covering core principles and cutting-edge technologies that are reshaping the way we interact with the digital world.

Objectives

In this masterclass, you will delve into the foundational principles of Web3, gaining a deep understanding of crucial concepts such as ownership, privacy, security, and decentralization. We will demystify the underlying technologies that power Web3, including blockchain, data vaults, and self-sovereign identity systems. By the end of this course, you will be equipped with the knowledge and insights needed to navigate the Web3 landscape with confidence and make informed decisions in this new era of the internet.

/ Date: starts from March 2024, self paced
/ Location: online

/ Price: €250
/ Included:

- * 5x2h online classes
- * online personal feedback
