Ethereum & Hyperledger Fabric Development

Master your smart contracts

INTERMEDIATE

Are you ready to take your blockchain and programming skills to the next level? Join our technical masterclass, "Ethereum & Hyperledger Fabric Development," designed for individuals with a foundational understanding of blockchain technology and programming. This comprehensive course is tailored to empower you with the expertise and practical experience required to create your own smart contracts and applications on two prominent blockchain platforms, Ethereum and Hyperledger Fabric.

Objectives

In this masterclass, you will advance your blockchain and programming skills to create smart contracts on Ethereum and Hyperledger Fabric. Key objectives include mastering smart contract development, understanding blockchain ecosystems, deployment and testing, security best practices, exploring real-world use cases, integration and interoperability strategies, and hands-on project experience. By the end of the course, you'll be well-prepared to design and deploy smart contracts for various applications and industries, making you a proficient blockchain developer.

/ Date: starts from March 2024, self paced
/ Location: online

/ Price: €250
/ Included:
    * 5x2h online classes
    * online personal feedback
